# Air Shipments to Africa

Yet another successful Air Charter operation from  
Navigators Shipping & Logistica L.L.C., Dubai

By Corpcomm Dept: 15th May 2020

"The entire movement proved to be challenging and was completed overcoming lot of major and minor hurdles and as usual our team were enthusiastically delivering their best throughout the process. Each point of the entire project was carefully assessed to ensure a fool proof and smooth journey of the cargo. We hope that this successful operation of Navigators, might eventually open up more opportunities for us in the African region".

Mentioned Renji Mathew - Sales Manager

### THOUGHT FOR THE DAY

"The storm only comes to  
teach you how to skillfully  
sail your ship."

*Matshona Dhliwayo*

The Air Cargo team at Navigators Shipping & Logistica L.L.C., Dubai shared details of a special Air cargo project they handled in Dubai. Recently, two full charter flights were operated successfully which carried printed materials to Africa for a major client. The air shipments consisted of highly time sensitive printed materials which required two separate flights. The first charter lifted 118 Pallets of cargo with a total weight of 89 Tons and the second one carried 128 pallets with 85 tons of cargo within the specific time as insisted and demanded by the client.

The documentation and legal procedures were prearranged and executed by the Air Cargo team within the timeline.

It was an end-to-end scope of work which included cargo collection from the supplier, high-value packing, transportation to the airport, contracting the charter flights and handling the airport customs procedures. B747 flights were operated for this air cargo project. As is the practice, extensive study and survey was conducted as part of this movement regarding the origin, destination, and the travel route.

**Logistics  
Possible.**
